6 Months

Library Management.

Way2Web Pvt Ltd

A Library Management System (LMS) project is a software application designed to help libraries manage their resources and operations more effectively. This project could include features that allow library staff and users to manage book loans, returns, inventory, user registrations, and various administrative tasks

Projects

8 Months

Nido

This is a Property Management project where I developed various CRUD functionalities, created email templates, and integrated Google Maps to display property locations.

15 Months

Oncall

This project focuses on call management, incorporating features such as dial plan management, ring groups, time conditions, contacts, contact groups, and SMS conversations. Additionally, it includes transcription capabilities for converting text to audio and audio to text. The project is developed using the Yii2 framework.

8 Months

Solar CRM

This project Solar related CRM system. This using Lead to convert customers. I was working with the backend in NodeJS.

15 Months

HireNation

This project is a job portal consisting of two parts: a Job Seeker side and an Employer side. It includes Google Maps integration to display job locations for job seekers. I worked on both sides using Laravel and also developed APIs for the mobile app

8 Months

Zongo PBX

This project is focused on call management. It includes features for managing dial plans, ring groups, time availability, contacts, contact groups, emails, and more. The project is developed using ReactJS for the frontend and NodeJS for the backend. I contributed to both frontend and backend development.

6 Months

i3 Global CRM

This project focuses on managing lead imports and affiliate users. It involves handling large volumes of lead imports, where affiliate users also contribute by importing their leads. Additionally, the project includes functionality to transfer leads to another server for further processing
